HOW TO LAYER RIGHT

- HOW TO DRESS TO MAKE THE MOST OF YOUR WINTER!

Enjoying the winter is often just a matter of dressing up. The Lynx clothing lineup offers a wide range of options for wearing comfortable layers. Make sure that you stay comfortable and that you are dressed for the conditions and the temperature - both on the snowmobile and in other winter activities.

1 Wearing properly layered clothing starts with a high-quality base layer. A base layer of merino wool or technical fibers wicks moisture to the outer layers and keeps the skin dry, ensuring that you stay warm.

2 The mid layer helps to regulate the body temperature. You can add or take off mid layers depending on the weather and your activity level. For example, the Lynx Hybrid jacket and shorts are designed for active riding in freezing weather. The Primaloft insulation used in the Hybrid products keeps you warm, while a set of strategically placed stretch channels ensures that moisture is actively wicked out through the outer layer. Lynx clothing lineup offers three new insulation jacket options and other mid layer products that make sure that your riding experience is enjoyable in all conditions.

3 Insulated layer. Add or adjust the warmth with insulated layer. Insulated jacket protects from the elements with additional warmth. Insulated jacket can be used alone or under shell jackets. Lynx offers down insulated packable jackets and Hybrid jacket and shorts for ideal layering.

4 Choose the outermost layer based on the temperature, the length of the trip and your riding style. You can choose from a wide range of one- and two-piece suits. The high-quality materials of Lynx clothing range's outermost layer protect you from the wind and water, while also taking care of breathability and temperature regulation. We use Sympatex and RPM Max membranes in the outermost layer. They have been selected and tested with care to meet the needs of demanding riders and other winter sports enthusiasts. The season's new outer layer items include one-piece suits for men, women and children in the Lynx Squadron lineup.

TEC LAYER

Stay warm and dry in extreme conditions

Using high performance fabrics and insulation, the Lynx Tec-Layer product range offers a combination of moisture management, warmth, packability and protection in changing weather conditions and multiple activities. The original Lynx baselayers together with insulated lightweight Lynx midlayers give you the degree of adaptability, that will keep you comfortable during your toughest snowmobiling adventures.
